

# Medical Center Parking

---

Medical Center parking operations are sometimes the most challenging of any market segment. Patients, families, doctors, employees and visitors all have unique requirements and the PARCS system must be extremely flexible to accommodate these client types. TIBA's modular design is simple, user friendly and easily configured to manage Medical Center clientele. Owner and operators of these facilities are constantly balancing the priorities of customer service and revenues streams. TIBA PARCS systems can help you manage that balance with smart technologies at affordable prices.

- Rugged stainless steel construction.
- Simple modular design that requires **only** a single device in any entrance or exit lane.
- Flexible validation solutions that range from desktop units to eValidations over the internet.
- User interface and database fields may be customized for employees department, shift schedule, and security level.
- All modes of operation; pay-on-foot, pay-in-lane, central cashiering, exit cashiering and pre-pay.
- Lower total cost of ownership. Lower consumable prices, system pricing and ongoing maintenance costs.
- Patrons can convert their parking ticket to a reusable multi-day pass at a pay-on-foot or pay-in-lane machine.
- System compatibility with campus building card access, CCTV and intercoms.
- Multiple facility management without costly site licensing.
- Supports nesting areas for cardholders.
- Supports VIP parking areas.
